Coding Ninja :// farishjamal

ACHIEVEMENTS

Solved 350+ Problem across Leet code, GFG, Hacker Rank,Coding Ninjas.
4* Coder at Hacker Rank and Ninja Dominator at Coding Ninjas.

COURSEWORK

UNDERGRADUATE

Introduction to Programming
Data Structure and Algorithm
Operating System
Machine Learning
Computer Architecture
Computer Network

EDUCATION

JAMIA MILLIA ISLAMIA, NEW DELHI

Diploma, Computer Science Engineering July 2020 - Apr 2023
CGPA: 8.4 / 10.0

MAHARAJA AGRASEN INSTITUTE OF TECHNOLOGY

BTech Electronics and Communication Engineering
Sept 2023 - July 2026
CGPA: 7.0 / 10.0

EXPERIENCE

SEWZEE| Full Stack Intern

Mar 2024 – Present | Remote

- Developed backend systems with **Node.js** and **Express**, focusing on **authentication**, **authorization**, and **token** management.
- Implemented secure backend routes for **admin** and **seller panel**, ensuring robust access control and data protection.
- Collaborated with cross-functional teams to integrate backend services, ensuring seamless functionality across the platform.

HOSTING SALAH| Frontend Developer Intern

Jan 2022 – Mar 2022 | Remote

- I applied my proficiency in **front-end** development to successfully complete and contribute to tangible, real-life projects.
- Designed and engineered **front-end web applications** with a primary focus on user experience and **interface design**, ensuring alignment with project objectives and end-user satisfaction.

PROJECTS

SOCIAL MEDIA APP | [GITHUB]

- Implemented core features including **commenting**, **likes**, **friend requests**, and **profile viewing**.
- Integrated **MongoDB** for scalable data storage and management.
- Managed media uploads with **Cloudinary** and **Multer** for efficient storage and retrieval.
- Designed a responsive and dynamic front-end using **React** and **Shadcn**.

CHAT BOT | [GITHUB]

- A chatbot that uses the **OpenAI API** for natural language processing. It's built on **Express.js** for the backend, **MongoDB** for data storage, and **EJS** for templating.
- The chatbot provides intelligent responses, scalability, security, and customization options for an engaging user experience.

BLOG WEBSITE | [GITHUB]

- Developed a dynamic blog website incorporating Express.js, **MongoDB**, **EJS**, **React.js**, **Bootstrap**, **JWT**, and **Multer**.
- Users can publish posts with images, manage comments, and experience seamless browsing on all devices.
- Utilized **JWT** for secure authentication, ensuring data integrity. Demonstrated expertise in full-stack development.

Web Based Chat Application | [GITHUB]

- Developed a real-time chat application using **React.js**, providingseamless messaging capabilities for users.
- Integrated **Firebase** database for real-time data retrieval.
- Ensured data security and user authentication by leveraging **Firebase'sbuilt-in authentication services** and rules.
